well provided
 during pregnancy

Hand in hand

You are pregnant congratulations

The Public Health System in Austria offers pregnant women the possibility to get expert answers relating to pregnancy, birth and other on-topic questions.

Currently we are doing our training to become midwives at the University of Applied Science for Health professions in Upper Austria and would like to offer you FREE support/ advice.

We accompany you

- to a consultation with a midwife between week 18-22
- to a tour of the labor ward at a hospital
- to a breastfeeding consultation

As we are not ready qualified midwives yet, we are not in the position to give medical advice. We, however, can support you getting in contact with professional medical staff and locations. Do not hesitate to ask for support!

As future midwives we are highly motivated to help you in word and deed!
